JUAN ALBERTO QUIROZ SANCHEZ

TECHNICAL FOUNDER · FOUNDING ENGINEER

Carabobo, Venezuela · Remote (UTC-4, full overlap with US Eastern)
juanquirozsana@gmail.com · +58 424-4155614 · linkedin.com/in/dreyz · github.com/juanquiro · juanquiro.vercel.app

Profile

Technical founder who ships regulated software end to end. Built and launched two production systems solo: a multi-currency sales and accounting SaaS for LATAM SMBs (41-table schema, 303 endpoints, WhatsApp ordering) and a 59-module clinic ERP with a Rust ML service. Five years across FinTech and automation: credit engines, PCI DSS payments, and SAP-synced RPA. Looking for a founding engineer seat where the job is to own the product, not the ticket queue.

Experience

Founder & Software Engineer — 2025 – Present

Ember Drago

Cocolu Ventas *Sales, inventory & accounting SaaS*

- **Architecture:** hexagonal TypeScript backend with six bounded modules — 67k LOC, 41-table schema, 303 HTTP routes.
- **Payments:** multi-currency checkout (Zelle, PayPal, Pago Móvil, cash) with tested commission and cash-closing logic.
- **WhatsApp bot:** Baileys / BotBuilder agent that takes orders, checks stock, and confirms payment end to end.
- **Dashboard & QA:** React 18 admin app with role-based access; 349 test files across unit, integration, and business rules.

SOS Dental *Clinic management ERP*

- **Scope:** 59-module Flutter Web ERP for a dental clinic — patients, appointments, odontogram, payments, payroll, inventory, analytics, patient portal.
- **ML service:** Rust (axum + ONNX) predicting churn, LTV, and appointment cancellation, wired into the clinic dashboard.
- **Operations:** PocketBase backend, audit logging, role-based access, ES/EN/AR UI, Docker deployment on a VPS.

Assistant to the Vice-Rector — 2025 – Present

UNITEC

- **UNITEC portal:** Drupal (content, sections, publishing) and Excel for Vice-Rector's reports.
- **Library and repository:** DSpace, OJS, and CRIS-lite; proposal to the Vice-Rector's office.

Independent Software Consultant — 2023 – 2025

Multi-client consulting

Empresys *Full Stack Lead & RPA Engineer* — Oct 2023 – Jun 2024

- **RPA at scale:** enterprise RPA suite for a major Asian logistics partner — 100% of ingestion and reporting automated.
- **Impact:** 20% lower operating costs, 40% faster execution, 2x deploy frequency via CI/CD and trunk-based delivery.

Daka *Application Development Consultant* — Oct 2024 – Mar 2025

- **ERP & BI:** SAP HANA integrations and SQL reporting for the retail group's technology arm.

MotoStudio *Fractional Technical Lead & Architect* — Oct 2023 – Present

- **Credit engine:** interest, amortization, and automated bank reconciliation for a vehicle financing platform.
- **Payments & delivery:** multi-layer auth and PCI DSS-compatible gateways; zero-to-one launch on AWS and VPS.

Technical Lead — 2022 – 2023

NoCountry

- **Delivery:** led a squad from frontend to backend, cutting delivery times 30%; mentored juniors in XP and TDD.

Skills

Languages	TypeScript, JavaScript, Python, Java, Ruby, Dart, Rust, SQL
Frameworks	Node.js, Express, NestJS, React, Next.js, Vue, Svelte, Astro, GraphQL, Drupal
Data	PostgreSQL, MySQL, SQLite, MongoDB, SAP HANA, Prisma, schema design, migrations
Backend	REST, Zod, JWT, hexagonal architecture, API design
Automation	WhatsApp (Baileys, BotBuilder), RPA, SAP-synced bots, process automation
Payments	Stripe, PayPal, Zelle, Pago Móvil, PCI DSS, bank reconciliation
Infrastructure	Docker, Linux, CI/CD, AWS, Sentry, Pino, Litestream, VPS

Education

Systems Engineering — Venezuela

UNITEC — Universidad Tecnológica del Centro

Languages: Spanish — Native · English — Professional working proficiency (C1)
